

Bumsu Kim

Integrated M.S./Ph.D. Student

Intelligent Mobile Computing Lab | Hanyang University

bmori3@hanyang.ac.kr | github.com/withSu | withsu.github.io

RESEARCH INTERESTS

MLLM self-improvement / Self-evolving AI / Multimodal learning / Industrial anomaly detection

EDUCATION

Integrated M.S./Ph.D. Program

Sep 2026 - Present

Hanyang University

RESEARCH EXPERIENCE

Research Member

Jan 2026 - Present

Intelligent Mobile Computing Lab, Hanyang University

Joined IMC Lab in January 2026; began the integrated M.S./Ph.D. program in September 2026.

Undergraduate Research

Sep 2024 - Dec 2025

CBNU Robotics Lab

Object-level anomaly detection for semiconductor microdevices.

SELECTED PROJECTS

Anomaly Detection for Semiconductor Microdevices

Sep 2024 - Dec 2025

Undergraduate research on object-level anomaly detection for semiconductor microdevices at CBNU Robotics Lab.

Long-term Memory with Associative Recall

Public project

A conversational AI prototype that organizes memories as a network of related concepts and retrieves them through associative recall.
